PROFESSIONAL SUMMARY

Highly motivated Software Engineering (RPL) Graduate from SMK Negeri 2 Purwakarta with practical internship experience as a Fullstack Web Developer. Specialize in backend and frontend web development with core expertise in PHP and the Laravel framework. Proficient in designing robust MySQL databases, implementing dynamic system features, and utilizing Git/GitHub for efficient team collaboration. Recognized as a detail-oriented, disciplined, and responsible individual eager to contribute and grow within fast-paced tech environments.

TECHNICAL SKILLS

PHP

Laravel

MySQL

HTML5

CSS3

JavaScript

Bootstrap

Git & GitHub

Database Design

Visual Studio Code

XAMPP

Figma (Basic)

WORK EXPERIENCE

Fullstack Web Developer Intern

January 2025 – April 2025

PT Pratama Solusi Teknologi

- Developed and maintained enterprise-grade web applications using PHP and the Laravel framework.
- Designed optimized MySQL database schemas and implemented secure, high-efficiency data queries.
- Performed comprehensive system testing, debugging, and advanced troubleshooting to ensure smooth operation.
- Collaborated actively with core developer teams using Git version control to consistently meet project deadlines.
- Applied strict time management protocols and high attention to detail to maintain code quality standards.

PORTFOLIO PROJECTS

Library Management System

Independent Project

Technologies: Laravel, PHP, MySQL, Bootstrap

- Developed robust book cataloging, member registration, and automated loan/return tracking features.
- Implemented secure CRUD operations along with a multi-level role-based user authentication system.

Employee Attendance System

Independent Project

Technologies: Laravel, PHP, MySQL, CSS3

- Built a real-time clock-in/clock-out attendance tracker and structured data modules for periodic reporting.
- Created an intuitive administrative dashboard to help management efficiently monitor workplace productivity.

OSIS & MPK Management Website

School Project

Technologies: Django, Python, SQLite, HTML5

- Engineered an internal management platform for organizational members, official announcements, and meeting logs.
- Designed a fully responsive public landing page alongside an intuitive backend administrator dashboard.

EDUCATION

SMK Negeri 2 Purwakarta

2023 – 2026

Major: Software Engineering (Rekayasa Perangkat Lunak)

Focused on core software architecture, programming algorithms, relational database management systems, and modern web frameworks.

PROFESSIONAL CERTIFICATIONS

- **Laravel Web Programmer** – DigiUp Program by Telkom Indonesia
- **AI Engineer (Beginner)** – IDCamp by Indosat Ooredoo Hutchison & Dicoding

LANGUAGES

- **Indonesian** – Native Speaker
- **English** – Intermediate Proficiency
